

A solution for every application

With our LF and New Generation XD and XF trucks, DAF is introducing a full e-Range portfolio. Comprising both tractors and rigid, optional battery configurations and e-PTO's - ensuring that each truck can be tailored to suit the vehicle's application and, therefore, your needs as a customer.

Going the distance

Without doubt, range is the main concern when considering an all-electric driveline. However, the greatest range (over 500 km), which requires a 525 kWh battery pack, is not always the most suitable for your application. Weight or chassis-layout restrictions also influence the decision. That's why DAF has created route simulation software for the dealer network, enabling them to give you the best insights into how to achieve zero emissions. The software takes into account all the variables that may come into play, ranging from regular heavy traffic to the use of auxiliary vehicle functions like airco or heating. The result is a realistic simulation with comparative range, ensuring you have the optimum truck configuration and charging strategy.

Charging options

DAF also offers a flexible range of charging options - from on-board to fast charging - to ensure set-up is tailored to your business operation. What's more, these charging strategies can be used within the simulation to eliminate unnecessary waiting time, and make sure charging is fully optimised for your application.

Always in control

DAF also offers support to make sure both company and driver operate your electric truck to its maximum potential:

- DAF Driver training as preparation for your daily trips
- A fully digital and interactive dashboard for your driver to stay in control during their journey
- DAF Connected Services to optimise your operation

We've got you covered

As you would expect, our service network is fully geared-up to have you as a DAF Electric customer. What's more, DAF offers a 6-year warranty on batteries and full repair and maintenance contracts for the lifespan of your electric vehicle. Giving you complete peace-of-mind about keeping your vehicle up and running and on the road.

We are ready

The future is here and we're ready, willing and able to help you to not just step into it, but face all challenges head on.

DAF Services

DAF MULTISUPPORT

This extensive range of repair and maintenance contracts leads to predictable costs as well as maximum peace of mind. Whichever contract you choose, they all offer the highest quality of service and support for your vehicles.

DAF ELECTRIC TRUCKS

Driving zero emissions

Driving the future

DAF Trucks develops innovative solutions to the challenges currently facing the transport industry. Changes triggered by a combination of EU and more local legislation, and the desire to introduce more sustainable transport, has brought forward the transition to zero emission solutions within many towns and cities.

For over 90 years, DAF customers have been able to rely on us to supply the best trucks for comfort, drivability and efficiency, along with the best service and support.

Rest assured that the shift to zero emission solutions will not change this as DAF comes fully prepared to guide you through this transition period. Not only with an all-electric driveline for our LF and newly introduced New Generation DAF XD and XF powered with LFP batteries, but also by offering you the best advice on converting your operation to electric. With state-of-the-art route simulations and a range of charging solutions combined with connected services.

DAF LF ELECTRIC

Clean, silent, with high manoeuvrability, the LF Electric is at home in every city center for every application. Plus, with onboard AC charging, it is ideal for an easy transition to an all-electric operation.

DAF XD ELECTRIC

The best truck for regional and city distribution, the XD offers best-in-class direct vision with panoramic windows, ultra-low vision dashboard and a low mounted cab. The most versatile truck for every application.

DAF XF ELECTRIC

The award winning XF combines unequalled safety with future-facing driver comfort. With ranges up to 500 km, this truck is ideal for regional or national haulage.
